

# WOMEN AND MEN CREATING OUR FUTURE TOGETHER

*Practical advice on how to create cultures where all people thrive*

The excitement of technology is contagious. Technologies, such as artificial intelligence and block chain promise to revolutionize our society and our lives. And yet technology creation still lacks significant participation from many people, including women, black, and Hispanic engineers and computer scientists. Dr. Whitney, a computer scientist, entrepreneur and world recognized expert on women in technology will speak on the dream of inclusion in technology.

She will discuss her own journey as a women engineer, and her efforts to create a global movement for women technologists. She will discuss the landscape today, why organizations benefit from creating cultures where all people thrive, and concrete actions you can take to create meaningful change.

## Hear from Dr. Telle Whitney on December 2nd at 11 AM EST

Telle Whitney is a senior executive leader, an entrepreneur, a recognized expert on diversity and inclusion, and a true pioneer on the issue of women and technology. She has over 20 years of leadership experience, and was named one of Fast Company's Most Influential Women in Technology. She is a frequent speaker on the topic of Women and Technology. Telle co-founded the Grace Hopper Celebration of Women in Computing Conference with Anita Borg in 1994 and served as CEO of the Anita Borg Institute from 2002 to September 2017. She transformed the Institute into a recognized world leader for women and technology.

She has won numerous awards including the ACM distinguished service award, an honorary degree from CMU, and is an honorary member of IEEE. She serves on multiple boards and advisory councils. She is also the co-founder of the National Center for Women and Information Technology (NCWIT).

Telle holds a Ph.D. and M.S. in Computer Science from the California Institute of Technology and a BS in Computer Science from the University of Utah.
